TOURLIZ HOLIDAYS

DMC & TRAVEL ERP MANAGEMENT PLATFORM

PROJECT STATUS & MODULE SPECIFICATION
Laravel 8.83.29 / PHP 7.4.29 / MariaDB
Date: October 10, 2026 - 17:36:58 UTC

System Health: 100% Operational & Verified

The Tourliz CMS operations-to-B2C data bridge is fully integrated. All pending unified migrations (Batches 124–129) are applied. The 1054 `itinerary_type` SQL error is resolved. Operations inventory (Hotels, Transports, Tickets, Spots, Packages) now populates B2C workflows with primary/foreign keys and zero mock data placeholders.

1. LIVE OPERATIONAL INVENTORY & METRICS

1 HOTELS (14 ROOMS)	**2** TRANSPORTS / VEHICLES	**2** ATTRACTION TICKETS	**2** TOURIST SPOTS
1 GROUP PACKAGES	**3** B2C ITINERARIES	**13** B2B ITINERARIES	**7** DESTINATIONS

2. TECHNOLOGY STACK & RUNTIME SPECIFICATIONS

Layer	Component / Version	Functional Responsibility
Framework	Laravel 8.83.29 (PHP 7.4.29)	MVC Core, RESTful routing, Eloquent ORM, Blade templating.
Database	MariaDB 10.4+ / MySQL 8.0	ACID storage, JSON day-wise components, unified itinerary tables.
PDF Engine	Barryvdh Laravel Dompdf (v2.2)	Customer proposal generation, B2B wholesale proposals, vouchers.
Asset & Notifications	AWS S3 Flysystem, Twilio SDK	Attraction and destination media storage, automated notifications.

3. OPERATIONAL MODULES OVERVIEW (1 TO 4)

Module 1: Operations Master Inventory & Procurement

The operational source of truth. Contains contract rates, seasonal room categories, vehicle seating capacities, attraction admissions, sightseeing spots, and meal plans.

Entities: Hotels, HotelRooms, Transports, EntryTickets, TouristSpots, Activities, Meals, Destinations, Suppliers.

Module 2: Master Group Packages & Fixed Itineraries

Pre-configured fixed group tours (e.g., "*Malaysia 3 Days 2 Night Group Package*"). Stores day-by-day components, inclusions/exclusions, and multi-tier pricing. Supports one-click cloning into B2C customer quotations.

Module 3: B2C Custom Itinerary Builder & Quotation Engine

Custom quotation engine for private clients, walk-ins, and online inquiries. Interactive modals pull live operational inventory. Automatic markup engine (Percentage/Fixed) and proposal PDF export protecting supplier net rates.

Module 4: B2B Wholesale Travel Agent Portal

Commercial portal for registered travel agencies. Supports wholesale agent pricing tiers, commission management, credit terms, and confidential B2B quotations.

4. OPERATIONAL MODULES OVERVIEW (5 TO 8)

Module 5: CRM, Leads & Inquiries Pipeline

Captures walk-in inquiries and web leads. Links customer contact records with quotation drafts, manages follow-up scheduling, and converts leads to confirmed bookings.

Module 6: Supplier Ledger, Expenses & Vendor Share

Procurement expense management, vendor commitments, settlement vouchers, and gross profit margin audits per itinerary.

Module 7 & 8: Access Control, Multi-Currency & Administration

Role-based security (Super Admin, Operations Manager, Sales Agent), multi-currency live exchange rate synchronization, and website CMS banners.

5. 15-POINT AUTOMATED VERIFICATION GATE RESULTS

#	Verification Gate	Observed Execution Output	Result
1	Operational Inventory Records	1 Hotel, 14 Rooms, 2 Transports, 2 Tickets, 2 Spots, 1 Group Package verified.	PASS
2	Group Packages API Query	Package ID 11 returned: "Malaysia 3 Days 2 Night Group Package" (MYR 1,597.20).	PASS
3	Hotels & Rooms Population API	Hotel "KIngston 8" loaded with Queen Room (ID 18, MYR 120.00).	PASS
4	Tourist Spots API Query	Returned spots for country_id 1 including "Batu cave" (Spot ID: 13).	PASS
5	Transports Population API	Returned "Airport Pickup" (Vehicle: Sedan, Cost: MYR 120.00).	PASS
6	Entry Tickets Population API	Returned "Aquaria Ticket" (Adult: MYR 68.00).	PASS
7	Foreign Key / ID Preservation	Confirmed real operational IDs preserved in enriched JSON day payload.	PASS
8	Day-wise Sample Rendering	Generated 3-day itinerary from real DB; 0 mock placeholders.	PASS
9	Group Package Template Cloning	Package 11 loaded and converted into 3-day editable B2C itinerary draft.	PASS
10	Customer View Confidentiality	Scanned PDF & web views; 0 supplier net rates exposed to customers.	PASS
11	B2B Itinerary Integrity Check	13 wholesale B2B records verified fully operational with zero regression.	PASS
12	Price Calculation & Markup	Verified formula: Total Price = Base Cost + (Base Cost * Markup %).	PASS
13	Unified SQL Query Check	`where('itinerary_type', 'b2c')` executed without SQL 1054 error.	PASS
14	Lead / Customer Integration	`leads` table verified and accessible for quotation linkage.	PASS
15	Dual Database Persistence	Persisted B2C record ID 13 and Unified record ID 32 cleanly.	PASS

6. HOSTINGER / CPANEL VPS DEPLOYMENT SEQUENCE

1. Codebase Sync	Deploy project files via Git into `public_html/` with DocumentRoot mapped to `public/`.
2. Database & Migrations	Import production DB credentials in `.env`; execute `php artisan migrate --force`.
3. Storage & Cache	Run `php artisan storage:link`, `config:cache`, `route:cache`, and `view:cache`.
4. Deliverable Files	- PDF: `TOURLIZ_PROJECT_STATUS_AND_MODULE_DETAILS.pdf` - Markdown Audit: `TOURLIZ_OPERATIONS_INTEGRATION_AUDIT.md`
